Announcements

Brief description of the course

Entering Graduate students in Chemistry, Chemistry and Physics Undergraduates.

Prerequisites

Understanding of Quantum Mechanics, Basic Mathematics

Syllabus

Exact Solutions (revision)

Perturbation Theory (Time dependent and independent)

Hartree Fock Methods (Formalism and SCF procedure)

CI, MP

DFT

Semiempirical Methods

Course outcomes

How quantum mechanics determines molecular shape; how molecular properties are computed.

Grading policy

Typical: 10% Assignments, 20% Quizzes, 35% Midterm, 35% Endterm

Assignments

Resources

Landau and Lifshitz

Schiff,

Cohen Tannoudji,

Szabo and Ostlund

Levine
