

ANNOUNCEMENT

This announcement concerns applications made to the Indian Institute of Science, Bangalore. Recognizing the difficulties in travelling to IISc from different parts of India, IISc will not be hosting in-person campus interviews for their MTech(Res)/Ph.D /Integrated Ph.D program this year. Instead, some departments may be offering admission based on National Qualifying Exams such as GATE or CSIR and in other departments, the selection process may involve **online video interviews**.

Candidates are therefore required to immediately login into the application portal and confirm their willingness to appear for an online video interview. In case the candidate is shortlisted by a department for an interview, information will be sent through the registered email. The online video interview would take place in July 2020 through a suitable online platform such as Microsoft Teams or SKYPE. Candidate should also provide a telephone number through which IISc can communicate during this time.

If the candidate does not have access to internet facilities and therefore does not wish to take up the online interview now, candidates could defer their application to the **next** admission cycle as a special case. The next admission cycle will possibly be held in December 2020, if normalcy is restored in the country by then for the January 2021 term. Please note that the application only allows one to be considered for admission either in August 2020 or January 2021. Candidates must exercise this option before 16th. June 2020 failing which the candidate's application will be considered in the next admission cycle.
