

Paraspar, an initiative of the Office of Communications (OoC) at the Indian Institute of Science (IISc), is a platform for conversations about knowledge systems, particularly science.

Paraspar

invites you to a webinar series on

Journey of **Discovery** in Science

This series will explore the journey of scientific discoveries. Very often, science is known only by its finished product. But the path is not revealed. Through these lectures, we attempt to unravel the processes of science, including the struggles and failures.

What Big Data Can Tell Us about the Origin of Scientific Knowledge

How does knowledge emerge? Is it by sudden spurts or is it incremental? While this question is as old as modern civilization, the answer seems to be in the big data of the 21st century. The talk will explore the dynamics of knowledge development.
