# Green pacts inked at India, Denmark summit

MoU signed between Reliance and Stiesdal Fuel Technologies to set up hydrogen electrolyser plant in India

SEHASINI RAJADAR  
NEW DELHI

India and Denmark signed two agreements on research in climate change, while another MoU on setting up a "green hydrogen" electrolyser plant was signed between Reliance Industries and Danish company Stiesdal Fuel Technologies as Prime Minister Narendra Modi met with Prime Minister of Denmark Mette Frederiksen on Saturday.

This was the first summit-level visit to India since the onset of the pandemic, and the first State visit by a Danish leader since a bilateral freeze on ties a decade ago.

## 'New dimensions'

"We also took a decision today that we will continue to expand the scope of our cooperation, adding new dimensions to it. We have initiated a new partnership in the field of health. In order to increase the agricultural productivity and income of farmers in India, we have also decided to cooperate in agriculture-related technolo-

**Deepening ties:** Prime Minister Narendra Modi interacting with his Denmark counterpart Mette Frederiksen at Hyderabad House in New Delhi on Saturday. >>>

gy," said Mr. Modi after the bilateral summit, adding that joint ventures on food safety, cold chains, food processing and water management would be explored as a result of their discussions.

The government agreements, including one between the Council of Scientific and Industrial Research and the Geological Survey of Denmark to conduct ground-water mapping and the other

between the Indian Institute of Science and Danfoss Industries to set up a research centre on carbon-based cooling systems are part of the "Green Strategic Partnership" that India and Denmark forged after a virtual summit between Mr. Modi and Ms. Frederiksen in September 2020.

Meanwhile, the commercial MoU between Reliance Industries Limited and Sties-

dal Fuel Technologies will work on development of a hydrogen electrolyser for zero-carbon hydrogen to be manufactured in India.

Stiesdal founder Henrik Stiesdal is also on Reliance's nine-member "New Energy Council" announced in August this year, with plans to build four factories for the production of solar photovoltaic modules, electrolysers, fuel cells, and storage

batteries in Gujarat.

"I am proud that Danish solutions play a key role when it comes to your very ambitious targets and I think you are an inspiration for the rest of the world. You have set some very ambitious targets when it comes to clean water for over one million households and for renewable energy including offshore wind," Ms. Frederiksen said after the meeting.

India has also been engaged with European partners to drop objections to an India-South Africa proposal at the World Trade Organisation in October 2020 that seeks to have all patents related to COVID medicines and vaccines waived during the pandemic. When asked, MEA officials didn't confirm whether Mr. Modi had raised the issue, but said Ms. Frederiksen had been "impressed" with India's vaccination drive.

"We know that COVID is a major concern for the global community so this issue of how both countries are tackling COVID came up for dis-

ussion....We remain engaged with our partners on the WTO [proposal], and it is taking its course," said Renuka Sandhu, Secretary (West) at the MEA.

## Kim Davy issue

Ms. Frederiksen is the first Danish leader to be accorded a State visit since 2008, after which relations between the two countries soured over India's demand that Denmark extradite its citizen Kim Davy, who was the accused in the massive arms dump case in Punjab of 1995.

To a question on the issue of Denmark's refusal to deport Mr. Davy thus far, Ms. Sandhu said that "this matter was raised and we have an understanding that the legal process must go forward and both countries are working on it."

The two leaders also discussed the situation in Afghanistan and shared common concerns on terrorism, rights of women and minorities and the need for an inclusive government, officials said.

## India inks climate, agri pacts with Denmark

**EXPRESS NEWS SERVICE**  
@ New Delhi

**PRIME MINISTER** Narendra Modi on Saturday held talks with his Danish counterpart Mette Frederiksen where the two leaders agreed to expand Indo-Danish cooperation in the fields of agriculture, water management, climate change and also reviewed the progress of the Green Strategic Partnership.

"A year ago today, we took the historic decision to establish a Green Strategic Partnership in our virtual summit. This is a sign of far-reaching thinking and respect for the environment," the prime minister said.

The two leaders also witnessed the signing of four agreements and other MoUs. The agreements that were

signed include an understanding between National Geophysical Research Institute and Aarhus University and Geological Survey of Denmark and Greenland on mapping of ground water resources and aquifers; and an MoU between Indian Institute of Science and Danfoss Industries Private Limited to establish a Centre of Excellence towards natural refrigerants for tropical climates with potential applications and a joint letter of intent between the Ministry of Skill Development & Entrepreneurship and the government of Denmark.

Three commercial agreements were also announced. This included an MoU between Helixco Industries Limited and Stenbol Fuel Technologies on the development of the hydrogen electrolyser.

# India, Denmark agree on 5-yr action plan for Green Strategic Partnership

ANIRBAN BHAUMIK  
NEW DELHI, DHNS

India and Denmark on Saturday agreed on a five-year action plan to implement the bilateral "Green Strategic Partnership" as Prime Minister Narendra Modi played host to North European nation's Prime Minister Mette Frederiksen - the first foreign leader to visit India after the onset of the Covid-19 pandemic.

The two sides formally announced four pacts after Modi and Frederiksen had a meeting at the Hyderabad House in New Delhi.

The pacts included a Memorandum of Understanding between the Indian Institute of science in Bengaluru and Danoss Industries Private Limited of Denmark to establish a Centre of Excellence for research on natural refrigerants for tropical climates with potential applications.

The centre will spread knowledge about carbon dioxide-based cooling systems and offer competence and skills

Prime Minister Narendra Modi and his Denmark counterpart Mette Frederiksen before their meeting in New Delhi on Saturday. AFP

development on installation, commission, and maintaining carbon dioxide-based cooling systems.

The meeting between the Prime Ministers saw the two sides agreeing on a five-year action plan for implementation of the Green Strategic Partnership, which they had announced during a virtual meeting in September 2020 to advance political cooperation, expand economic relations

and green growth, create jobs and strengthen cooperation for implementation of the Paris Agreement to deal with climate change and achieve the Sustainable Development Goals set by the United Nations.

"This partnership is an example of how by collective effort, through technology, one can work for green growth, while preserving the environment," Modi said after his meeting with the Danish Prime Minister.

## PMs of Denmark & India witness MoUs between Danfoss & IISc

Chennai, Oct 11: Danfoss Industries Pvt Ltd., a leader in food, infrastructure, climate, and energy efficient technologies, has reiterated its commitment towards supporting Climate Change Action, by exchanging MoU with the Indian Institute of Science (IISc), Bangalore in the presence of Mette Frederiksen, Prime Minister of Denmark, Narendra Modi, Prime Minister of India, H.E Mr. Freddy Svane, Ambassador of Denmark to India, and other key dignitaries. The MoU was exchanged between Ravichandran Purushothaman, President, Danfoss India and Govindan Rangarajan, Director, IISc Bangalore.

Ravichandran Purushothaman, President - Danfoss India commented, "We are proud to support India's green transformation by drawing from our rich global expertise and experience in enabling industries worldwide to do more with less.

With our IISc collaboration, we hope to enhance R&D and skill development in the use of low GWP and natural refrigerants, as well as ensure that India's workforce is ready to engineer a sustainable tomorrow".

In a bid to enhance skill and technology exchange for the advancement of Indian HVAC&R industry, this collaboration aims to create a research and training centre focused on promoting the use of natural or Low GWP refrigerants. The MoU signed for a duration of four years and extendable to five, aims to provide training in best practices at various levels, including for teachers, students, field and maintenance engineers, technicians and practicing engineers.

Danfoss will provide hands-on training using demo systems both at IISc and the Danfoss campus. The company aims to empower students and faculty to work with

Danfoss and publish their research papers in reputed national and international conferences and peer-reviewed journals. Further, potential end users will be identified, and outreach activities will be organised to showcase sustainable technologies for further knowledge dissemination.

"Our association with Danfoss India will enable the research in cutting-edge clean and green refrigerant technologies and skilling of India's youth to pursue HVAC&R related careers. Danfoss' experience and domain knowledge in this field uniquely positions them as the appropriate industry partner for IISc. We are keen on working closely with them and promoting the usage of climate-friendly refrigerants across the country," said Prof. Govindan Rangarajan, Director, IISc Bangalore.

## Prime Ministers of Denmark & India witness the exchange of MoU between Danfoss & IISc promoting the research and use of low GWP & natural refrigerants

 Danfoss India signs MoU with IISc

Date: [October 11, 2021](#)  
Author: [indianbizreview](#)  
 [0 Comments](#)

Danfoss Industries Pvt Ltd., a leader in food, infrastructure, climate, and energy efficient technologies, has reiterated its commitment towards supporting Climate Change Action, by exchanging MoU with the Indian Institute of Science (IISc), Bangalore, in the presence of Ms. Mette Frederiksen, Prime Minister of Denmark, Shri Narendra Modi, Prime Minister of India, H.E. Mr. Freddy Svane, Ambassador of Denmark to India, and other key dignitaries. The MoU was exchanged between Mr. Ravichandran Purushothaman, President, Danfoss India, and Mr. Govindan Rangarajan, Director, IISc Bangalore.

Denmark is a pioneer in promoting a green economy and the knowledge sharing partnership between both countries will help India achieve its global sustainable development goals and ambitious targets on climate and energy. The industry-academia partnership between Danfoss & IISc is a true embodiment of what the Green Strategic partnership aims to achieve in securing our sustainable future.
